### 서술형 6문항의 형식 — 여섯 중 다섯이 <보기> 어구 배열

| 문항 | 형식                                                        | 배점 |
|----|-----------------------------------------------------------|----|
| 서1 | 지문 요약문 (A)(B) 배열(각 3, 부분점수 없음) + (C) 밑줄 동사 어법에 맞게 한 단어(2) | 8  |
| 서2 | 지문 내용을 <b>다른 사례 글에 적용</b> , (A)(B) 배열                     | 6  |
| 서3 | 본문 한 문장을 <b>재진술</b> 한 문장의 빈칸 배열                           | 3  |
| 서4 | 지문을 <b>대화문</b> 으로 바꾸고 (A)(B) 배열                           | 6  |
| 서5 | 요약문 (A)(B)를 <b>본문에서 찾아 그대로</b> 쓰기(한 단어씩, 각 2)             | 4  |
| 서6 | 빈칸 (A)(B) 배열(각 3.5)                                       | 7  |

조건은 늘 "주어진 어구만을 한 번씩 모두 사용", 철자 오류는 단어당 감점. 본문 문장을 그대로 쓰게 하지 않고 **요약·재진술·적용·대화**로 바꾼 문장의 빈칸을 채우게 했다. 어구는 후치 수식(분사구·관계절·similar to that between ~), 병렬(lost ~ and faced ~), to부정사 목적(in order to, a means to acquire) 단위로 잘려 있었다. 기출 예: (B) that / infants / their / an oxytocin feedback loop / activate / between / mothers and / similar to → activate an oxytocin feedback loop similar to that between mothers and their infants.

## 학습 우선순위 (기출 형식 유지 전제)

- ① **재진술문 조립력** — 원문 통합기가 아니라 분사구·관계절·병렬·to부정사 덩어리를 문장 구조로 다시 세우는 연습. 이 정리본의 서술형 예상은 모두 그 연습용(학교 선생님이 같은 문장을 쓴다는 보장은 없다).
- ② **어법 3문항 연속** — 관계사(who/which/that/what/전치사 +관계대명사), 병렬 동사 형태, 준동사, 교과서 언어 형식 4개(had been p.p. / 재귀대명사 강조 / It is ~ that / If it had not been for ~).

- ③ **주제 4문항 연속** — 지문마다 요지 한 줄과 영어 요약문으로 선지 어휘 (복수형 추상명사) 감각 익히기.
- ④ **워드마스터** — 뜻 암기만으론 부족. 새 문맥 공통 빈칸·문맥 어휘, 파생어 (품사 전환), 철자 혼동어.
- ⑤ **내용 일치(Booster 12강)** — 수치·고유명사 표로 정리.

## 2. 교과서 영어 II Lesson 1 — Build a Better World

본문 Two Heroes Who Fought a Deadly Disease (pp.15~21) · 언어

형식 ① had been p.p. ② 재귀대명사 강조용법

Big Question: How can we contribute to society? · 의사소통 기능: *We are supposed to come together and lend a helping hand to others.* (도덕적 의무 = ought to / have to) · *Don't forget to bring ~* (상기 = Remember to / Make sure you)

### L1-P1 p.15 · 1932년 11월, 두 과학자의 저녁

**요지** 대공황 3년째인 1932년 11월 말, Kendrick과 Eldering은 퇴근 뒤 백일해 아동의 집을 찾아 희미한 등불 아래 검체를 모은다.

**요약** In late 1932, after their regular workday ended, Kendrick and Eldering visited the homes of children with pertussis to collect samples by lamplight.

**어법** a world **ruined** by three years of ~(ruining ✕) · children **suffering** from a deadly disease **called** pertussis(현재분사 +과거분사) · as the children, coughing ~ and struggling ~, barely **hold** on to life(holds ✕: 주어 the children, 삽입 분사구에 속지 말 것) · is about to **begin** · go from home to home **collecting** samples(연속 동작) · as(~할 때)

**빈칸** a different kind of work is about to begin / by the faint light of their lamps

**일치** 1932년 11월 말, 대공황 3년째(T) · 방만한 부모가 아픈 것(F)

**서술형** 어형 변화 The two women went from home to home (collect) samples from the sick children by lamplight.

► collecting · 분사구문(연속 동작)

### L1-P2 p.16 · 백일해란

**요지** 백일해는 숨 들이칠 때 나는 'whooping' 소리로 이름이 붙은 세균성 질환. 1930년대 미국 연 6,000명 사망(95%가 5세 미만). 1906년 원인은 밝혀졌으나 기존 백신은 무효, 20년 넘게 성과 없음.

**요약** Named for its whooping sound, pertussis killed about 6,000 Americans a year in the 1930s, and although its cause had been identified in 1906, no effective vaccine existed until Kendrick and Eldering.

**어법** ★The cause **had been identified** in 1906, but the vaccines that **had been developed** were ineffective(과거완료 수동태; was identified ✕, had developed ✕) · **Because of** this distinct sound(Because ✕) · the sound **that** people with the disease **make**(makes ✕) · babies **who** contracted it · a chance of dying(동격 of) · die **of** · an effective **one**(= vaccine; it ✕) · one of the greatest **terrors**

**어휘** ineffective ↔ effective · fruitless · distinct · contract(병에 걸리다)

**빈칸** their efforts were fruitless — until Kendrick and Eldering came along

**수치** 연 6,000명 · 95% 5세 미만 · 1906년 · 20년 이상

**서술형** 재진술 배열 Although **(A)** in 1906, every vaccine developed over the next 20 years proved ineffective.

<보기> of pertussis / had been / identified / the cause

▶ the cause of pertussis had been identified · 과거완료 수동태(언어 형식 ①)

### L1-P3 p.17 · 만남과 동기, 열악한 여건

**요지** Kendrick은 1920년 미시간 보건부에 들어가 그곳에서 Eldering을 만났고 1932년 공동 연구 시작. 둘 다 어릴 때 백일해를 앓은 경험이 동기. 대공황으로 자금 부족, 무급 부업으로 매일 정규 업무 뒤 연구.

**요약** Both survivors of whooping cough as children, Kendrick and Eldering began developing a vaccine in 1932 as an unpaid side project, working after hours despite the Depression-era lack of funding.

**어법** studied ~ and **was recruited**(능동+수동 병렬) · **It was there that** she met ~ (강조) · they **had** each **survived** ~ as children **themselves**(★강조용법, 생략 가능) · research funding was limited **due to**(because ✕) · a second job **for which** they never received any payment(which ✕, for that ✕) · **would** get started(~하곤 했다) · the work **that** they were enthusiastic **about** · The difficulties (that) they faced did not stop them **from persisting**(to persist ✕) · not to make ~; **instead**, ~ to relieve(목적)

**어휘** recruit · bond · eager · enthusiastic · persist · relieve

**빈칸** Personal experience served as motivation / It was like having a second job for which they never received any payment

**일치** 추가 보수를 받았다(F)

**서술형** 재진술 배열 Although funding was scarce, **(A)** .

<보기> pursuing their goal / them from / they faced / never kept / the hardships

▶ the hardships they faced never kept them from pursuing their goal · keep A from v-ing

### L1-P4 p.18 · 개발 과정과 첫 현장 실험

**요지** 지역 의사-간호사가 준 'cough plates'로 균을 배양. 직접 검체를 모으러 갈 때마다 백신의 절박함을 실감. 임상 전 스스로에게 주사해 안전 확인. 1934~35년 1,592명 첫 현장 실험: 접종 712명 중 4명만 발병, 중증 없음.

**요약** Using cough plates from local doctors, the two grew the bacteria, tested the vaccine on themselves for safety, and in 1934~35 ran a first field test on 1,592 children with only four mild cases among the 712 vaccinated.

**어법** the bacteria **that cause** whooping cough(causes ✕) · a petri dish, **which** was then put into ~ (that ✕) · **This** allowed the bacteria **to grow** · colonies **that** ~ could analyze · were **reminded of** · suffering **caused** by · The sight of these innocent young victims coughing and struggling to breathe **was**(were ✕: 주어 the sight) · spent many long nights **studying** ~ and finally **produced** · be certain **that** · injected it into **themselves**(재귀용법 — 강조용법과 구별) · none of these cases **were** serious

**빈칸** a powerful reminder of the urgent need for an effective vaccine / to confirm that it was safe

**수치** 1934~1935 · 1,592명 · 접종 712명 중 4명 · 중증 0

**서술형** 재진술 배열 To make sure the vaccine was safe, **(A)** .

<보기> any clinical trial / they tested / before / it on themselves

▶ they tested it on themselves before any clinical trial · 재귀대명사 (재귀용법)

### L1-P5 p.19 · 자금난과 영부인의 도움

**요지** 더 큰 규모의 확인 실험을 원했으나 자금 부족. 1936년 영부인 Eleanor Roosevelt(남편은 소아마비)가 직접 연구실을 찾아 노력을 보고 대규모 실험 자금을 확보해 줌.

**요약** Lacking funds for larger trials, the scientists got unexpected help when First Lady Eleanor Roosevelt, whose husband had polio, visited their lab in 1936 and helped them secure funding for a large-scale trial.

**어법** **Despite** the apparent success(Although ✕) · became determined to expand ~ and (to) run · **With** thousands of children **continuing** to suffer(with + O + 현재분사; continued ✕) · found **themselves** in a desperate situation(재귀용법) · Eleanor Roosevelt **herself** visited(★강조용법) · saw with her own eyes the efforts **that** ~ were making(목적어 후치) · Eleanor Roosevelt, **whose** husband suffered from polio, **was** interested in **fighting** · came to realize · enough funding **to conduct**

**빈칸** help from an unexpected figure / a severe lack of funds

**일치** 시간 부족으로 확대 못 함(F — 자금) · 영부인이 직접 만남(T)

**서술형** 대화문 배열 A: How did they finally run a large-scale trial?

— B: Thanks to the First Lady, the two scientists **(A)** .

<보기> to run / obtained / a large-scale trial / enough funds

▶ obtained enough funds to run a large-scale trial · enough + 명사 + to-v

### L1-P6 p.20 · 대규모 실험 성공과 보급

**요지** 1937년 4,200명 이상 실험에서 높은 면역 확인 → 1940년 미국 전역 배포 → 4년 뒤 미국 의사협회 권장 예방접종 목록 등재 → 감염 급감. 연간 사망자 1934년 7,518명 → 1970년대 중반 10명 미만.

**요약** After a 1937 trial of over 4,200 children confirmed its effectiveness, the vaccine was distributed across the United States from 1940, and annual deaths fell from 7,518 in 1934 to under 10 by the mid-1970s.

**어법** **By** 1937(~까지) · **Just as** in their first field test · was amazed **at** · started **being distributed**(동명사 수동; distributing ✕) · it **was added to** · **the number** of annual deaths caused by ~, **which** had reached 7,518 in 1934, **dropped**(단수; which의 선행사 = the number)

**순서** ① 1936 영부인 방문 → ② 1937 4,000명 이상 실험 → ③ 1940 전국 배포 → ④ 1944 권장 목록 등재

**빈칸** a dramatic decline in whooping cough infections

**서술형** 본문에서 찾아 쓰기 Soon after the vaccine was added to the list of recommended immunizations, there was a dramatic (d\_\_\_\_\_) in whooping cough infections.

▶ decline · p.20

### L1-P7 p.21 · 겸손한 영웅들

**요지** 특허를 냈다면 큰 부자가 됐겠지만 '혼자 만든 게 아니다'라며 사양. 인터뷰도 피하고 과한 칭찬을 불편해함. 많은 생명을 구했다는 사실 자체가 보상.

**요약** Though they could have grown rich by patenting the vaccine, the modest pair refused the credit, avoided interviews, and found reward enough in knowing that lives were being saved.

**어법** ★they **could have become** very wealthy **if** they had **patented**(가정법 과거완료; patented ✕) · ★it **had not been created** by them alone, **but** with the help of many others(과거완료 수동태 + not A but B) · **not wanting** to

reveal(분사구문의 부정; not to want ✕) · the contribution (that) they **had made**(대과거) · the challenge of creating · the praise that they received **made** them  
**uncomfortable**(uncomfortably ✕) · **knowing** that so many lives **were being saved** ~ **was** enough of a reward(동명사 주어 단수; 과거진행 수동)

- 어휘** patent · genuinely · excessive · modest · remarkable  
**빈칸** enough of a reward for these remarkable and modest heroes  
**일치** 특허로 부자가 됨(F) · 칭찬이 불leen했던 이유 = 도전 자체를 즐김(T)

**서술형** 재진술 배열 Had they taken out a patent, **(A)**, but they chose not to.

<보기> could have / the two / made / a fortune

▶ the two could have made a fortune · 가정법 과거완료(if 생각 도치)

### L1 After You Read 요약문(p.22) — 서5형 '본문에서 찾아 쓰기' 1순위 재료

빈칸 후보 단어(요약문 순서): **whooping cough** → **bacteriologists** → **funding** → **side effects** → **field test** → **vaccinated** → **effectiveness** → **distributed**. 세부 T/F: 1930년대 연 6,000명·대부분 어린이(T) · 둘 다 어릴 때 백일해(T) · 1970년대 중반 연 10명 미만(T) · 특허로 돈 벌었다(F). 집중 포인트: **fewer than 10 deaths per year**, **only four of 712**.

### L1 Focus on Language (pp.24-25)

**Point 1** 과거완료 수동태 **had been p.p.** — 과거의 기준 시점보다 앞서 '이미 ~되어 있었다'. 예문: Even though the film's release **had been delayed** several times, its opening weekend was a great success. / Dinner **had been prepared** by the time the guests arrived. / the cast **had been** carefully **chosen**. 본문: p.16 had been identified / had been developed · p.21 had not been created. 범위 내 재출현: L1 Wrap Up pets that **had been abandoned** / L2-P6 a phenomenon that **had never been** properly **studied** / 모의40 those who **had been instructed**.

**Point 2** 재귀대명사 강조용법(생략해도 문장 성립) — Mark **himself** repaired the fan. / The manufacturers **themselves** admitted that ~. / the class **itself** was entertaining. 본문: as children **themselves**(p.17) · Eleanor Roosevelt **herself**(p.19). 재귀용법(생략 불가, 목적어)과 구별: injected it into **themselves**(p.18) · found **themselves**(p.19) · 모의31 find themselves · 모의37 limit themselves. 강조용법 재출현: 모의32 The uncertainty **itself** · 모의40 the actions **themselves** · B11-3 forests **themselves**.

**Word Building** -(i)ous: infect→infectious, envy→envious, continue→continuous, prosper→prosperous / -ity: immune→immunity, prior→priority, diverse→diversity, flexible→flexibility. **Collocation** urgent need/call/matter · run a test/a business/a campaign.

Big Question: How are scientific achievements made? · 의사소통 기능: I'd be very interested to know.(궁금증 = I'm curious about) · In short, ~ (요약 = In brief / To sum up)

### L2-P1 p.41 · 도입 — 과학은 모두의 것

**요지** 과학을 흰 가운 입은 과학자만의 영역으로 여기기 쉽지만 사실과 다르다. 과학은 모두의 것이며, 일반인이 큰 성과에 기여한 시민 과학 프로젝트 둘을 소개.

**요약** Science is not a domain reserved for professionals in lab coats; it belongs to everyone, and two citizen science projects show how ordinary people can advance it.

**어법** consider it **as** a domain **reserved** exclusively for(reserving ✕) · scientists ~ **who spend** their days **conducting** experiments and **analyzing** data(spend 시간 v-ing 병렬) · have very little in common **with** · far from the truth · science **belongs to** everyone(수동태 불가) · the ability **to play** a role · projects in **which** ordinary people have made contributions(which ✕: 뒤가 완전한 절)

**빈칸** this perception is far from the truth / science belongs to everyone

**어휘** domain · exclusively · perception · advancement · accomplishment

### L2-P2 p.42 · Classifying Galaxies ① Schawinski의 문제

**요지** 옥스퍼드의 젊은 천문학 연구자 Schawinski는 은하 이미지 약 100만 장을 모양별로 분류해야 했다. 비슷하지만 조금씩 달라 하나씩 봐야 했고, 5만 개에 고박 1주일. 남은 95만 개는?

**요약** At Oxford, Kevin Schawinski faced the dull task of classifying about a million galaxy images by shape one at a time; sorting just 50,000 took him a whole week.

**어법** a young researcher **studying** black holes(studied ✕) · This might sound **exciting**(excited ✕) · according to their shape · **Since** they all **looked similar** but **were** actually **shaped** slightly differently · the best way to do this was **to sort** them **while looking** at each one(접속사를 남긴 분사구문) · **It took** Schawinski a whole week **to classify** · the **remaining** 950,000

**빈칸** dull and time-consuming / a tremendous amount of time

**수치** 약 100만 장 · 5만 개 = 1주일 · 남은 95만 개

**서술형** 어형 변화 It took Schawinski a whole week (classify) just 50,000 galaxies.

### L2-P3 p.43 · Classifying Galaxies ② Galaxy Zoo의 탄생

**요지** 친구 Lintott의 제안(인터넷으로 도움 요청) → 크라우드소싱 프로젝트 Galaxy Zoo 출범. 웹사이트는 최대한 단순하게; 짧은 튜토리얼 뒤 은하 이미지를 보고 특징 버튼을 클릭.

**요약** On Chris Lintott's suggestion, Schawinski launched Galaxy Zoo, a deliberately simple crowdsourced website where visitors took a short tutorial and then classified galaxies by clicking buttons.

**어법** a friend **named** Chris Lintott · ★Lintott **suggested that he (should) turn** to the Internet(turns/turned ✕) · **ended up launching** · a project **known as** Galaxy Zoo · The website **was kept as simple as possible**(simply ✕) · allowed **those who** wanted to participate **to get** started · were greeted with a

## L2-P4 p.44 · Classifying Galaxies ③ 성과와 Zooniverse

**요지** 온라인 매체가 입소문을 내 참여자 급증: 시간당 약 7만 건, 1년 만에 8만 명 이상·7,500만 건 이상. 참여자가 없었다면 수십 년 걸렸을 일. 2007년 시작 후 Zooniverse로 성장, 등록 사용자 약 200만 명, 천문학·생물학·물리학 등.

**요약** Spread by online media, Galaxy Zoo drew over 80,000 volunteers who made more than 75 million classifications in eighteen months, and it has since grown into Zooniverse with about two million users.

**어법** ★It was online media **that** helped spread the word(강조 구문; help + (to) 동사원형) · , **bringing** more and more participants(분사구문; brought ✕) · classifications **were being made** per hour · ★If it had not been for those participants, Schawinski **couldn't have classified**(= Without / But for / Had it not been for) · it **would have taken** him decades · 15 years **have passed since** the project first **began** · Zooniverse, **which is** one of the most popular **platforms**(that ✕) · more active than ever before · **registered** users

## L2-P5 p.45 · Chasing Steve ① 오로라 추적자들의 발견

**요지** 캐나다 앨버타의 '오로라 추적자' 온라인 모임. 2014년 여름 밤하늘에 녹색·보라색 빛의 띠(수천 km, 몇 분~한 시간) 발견. 오로라와 비슷하지만 다른 특징. 정체를 몰라 애니메이션 장면에서 따 'Steve'로 명명.

**요약** In 2014, amateur aurora chasers in Alberta began photographing strange ribbons of green and purple light and, unsure what they were, named the phenomenon "Steve" after a scene in an animated movie.

**어법** would leave ~ and try(~하곤 했다) · notice **something strange appearing**(지각동사 + O + 현재분사; strange something ✕) · ribbons of light, **some of which** seemed to stretch(some of them ✕) · lasted for a few minutes, **while** other times ~(대조) · similar in appearance **to** · (Being) **Unsure of what they were**(간접의문문 어순) · name the phenomenon "Steve" · a movie **where** some characters give that name(which ✕)

## L2-P6 p.46 · Chasing Steve ② 전문가 확인과 STEVE

**요지** 천문학 교수와 NASA 과학자도 정체를 모름 → 연구된 적 없는 새 현상. NASA가 시민 참여 프로젝트 시작(진행 중). 발견자들을 기려 이름 유지,

대문자 STEVE = Strong Thermal Emission Velocity Enhancement. 공로는 추적자들에게; 아직 입증된 이론 없음.

**요약** When neither a professor nor a NASA scientist could identify Steve, it was recognized as a new phenomenon; NASA launched a citizen project, and the name was kept as STEVE to honor the amateurs who deserve the credit.

**어법** After **photographing** ~ and **discussing what it might be** · **neither of them** had any idea **what Steve was** · did not **resemble** anything they had seen(resemble with ✕) · a phenomenon **that had never been** properly **studied**(★ 과거완료 수동태) · a project **involving** the public · asked ordinary people **to gather** ~ and (to) send · the name **has been kept** · ★it is the dedicated members ~ **that deserve** the credit(deserves ✕: 강조 대상 복수) · ★If it had not been for them, it **might have remained unnoticed**(remain + 형용사) · none of them **have been proven**

## L2-P7 p.47 · 결론 — 시민 과학자

**요지** 두 프로젝트 참여자 대부분은 전문 과학자가 아닌 시민 과학자. 학위·실험복 없어도 가치 있는 기여 가능. 호기심과 관심만 있으면 누구나 될 수 있고, 다음 위대한 성과도 시민 과학자에게서 나올 수 있다.

**요약** Most participants in both projects were citizen scientists without degrees or lab coats, proving that anyone with curiosity can make valuable contributions to science.

**어법** Most of the individuals **involved** in these two projects **are**(is ✕) · people **who** desire to help advance science in areas **that** they are interested in · **Even though** ~ may not have · be capable of **making** · become **one**(= a citizen scientist) · citizen scientists **volunteering** their time · for the purpose of better **understanding**

### B11-1 IQ & EQ 문장 삽입

**요지** IQ(인지 능력)와 EQ(정서 능력)는 반대가 아니라 보완 관계. 성공에서 IQ 비중은 약 20%, 나머지는 운·사회 계층·정서 지능. 장기적 성공에는 EQ가 더 중요.

**요약** IQ and EQ are complementary rather than opposite, and since IQ explains only about a fifth of success, emotional intelligence matters more in the long run — it gets you promoted, not just hired.

**어법** qualities of mind ~, **which** is the ability(계속적; that ×) · to understand, (to) have, (to) manage 병렬 · **What** researchers are trying to understand **is** how ~ (That ×; 단수 동사) · the rest **depends** · IQ **gets you** the job(4형식)

**어휘** complement ↔ contradict(≠ compliment 칭찬) · promotion ↔ demotion · in the long term ↔ in the short term · empathy = compassion · success ≠ succession

**빈칸** IQ counts for 20%; the rest depends on everything from luck to ~

**삽입** 05 In the business world, ~ IQ gets you the job, but EQ gets you the promotion → 04(20%) 뒤, 06 주제문 앞

### B11-2 Self-disclosure 문장 삽입

**요지** 자기 노출은 친밀감의 토대이며 상호적이어야 한다. 주고받기가 화자에게 이해받고 보살핌받는 느낌을 주기 때문. 상대가 받아주지 않으면 더는 털어놓지 않아 친밀감이 멈춘다 → '그저 잘 듣는 사람'에게 진짜 친구가 드문 이유.

**요약** Intimacy grows only when self-disclosure is mutual, because sharing in return makes the speaker feel understood and accepted; a mere "good listener" rarely builds real friendships.

**어법** a process of communication **by which** one person reveals(which ×: 완전한 절) · it is extremely important **that** ~ (가주어) · something personally **relevant** · it makes the speaker **feel**(to feel ×) that they **are being understood** · feel **accepted**(accepting ×) · **which stops** the development(앞 절 전체; that ×) · someone who is considered ~ rarely **has**(have ×)

**어휘** reveal/disclose ↔ conceal · intimate ≠ intimidate · relevant ↔ irrelevant · essential = vital · rarely = seldom · process ≠ procession

**빈칸** 06 which stops the development of intimacy

**삽입** 05 This give-and-take process is essential → 04(주제문) 뒤; This = 서로 털어놓기

### B11-3 Black spruce & fire 문장 삽입

**요지** 산불은 숲 파괴의 주요 원인이지만 북방림의 검은가문비는 강한 열에만 열리는 솔방울 덕에 산불 뒤 번식한다. 그러나 더 뜨거워지는 여름 → 더 강하고 잦은 산불 → 새 묘목이 싹트기 어려움.

**요약** The black spruce depends on fire to open its cones and release its seeds, but hotter summers now bring wildfires so intense and frequent that new trees struggle to sprout.

**어법** not only to forests **themselves**, but also ~ (강조용법) · species **living** in the forests · the black spruce, **which** is widespread ~, **owes** its success **to** an adaption(원문 표기; = adaptation) · cones **that open up** and **release** · only when they **are exposed to** · after a wildfire **has swept** through · a trend that makes **it** harder **for** new spruce **to sprout**(가목적어)

**어휘** release ↔ retain · intense ≠ intensive · favor ↔ hinder · sprout ↔ wither · widespread = prevalent · be no stranger to(익숙하다)

**빈칸** 07 makes it harder for new spruce to sprout

**요지** 철도 노동자 Gage는 폭발로 쇠파이프(3피트, 13파운드)가 머리를 관통해 뇌 대부분을 잃고도 곧 의식을 되찾아 몇 달 뒤 복귀. 의사들은 지금도 설명 못 함. 사후 두개골은 매사추세츠 의대 박물관에 '살려진 의지'의 기념물로.

**요약** After an explosion drove an iron bar through his skull, Phineas Gage unexpectedly recovered and lived for years, and his skull now stands in a museum as a monument to the human will to live.

**어법** dynamite accidentally **exploded**(was exploded ✕: 자동사) · a three-foot-long, 13-pound iron bar(단위 단수형) · **destroying** most of his brain(분사구문 = and it destroyed) · was thrown ~, but **regained** · **disoriented**(disorienting ✕) · think **clearly** and (to) return · doctors **have found** no plausible explanation · expected Gage **to survive** · the museum ~, **where** it **remains**(계속적 관계부사) · the human will **to live**

**어휘** plausible ↔ implausible · consciousness ≠ conscience · recovery ↔ relapse · tend(돌보다) · monument = memorial

**빈칸** 09 a monument to the human will to live

#### B14-1 Content business going digital 어법

**요지** 20년 넘게 기술업에 몸담은 저자의 소프트웨어는 이미 구식. 콘텐츠 사업은 손해 보는 일이라 여겼으나 콘텐츠가 디지털화되자 전망이 밝아 보였고 콘텐츠 소유권에 눈을 땀. 아날로그 유통은 소수 기업이 통제했지만 디지털은 수천 가지 방식으로 전달되고 그 수는 늘어난다.

**요약** Once dismissing content as a losing business, the author changed his mind when content went digital, because digital content can be delivered in countless and ever-growing ways beyond the control of a few companies.

**어법** Although I have been involved(Despite ✕; involving ✕) · the software that I have written is long outdated · processes (that) I have developed may still be in use, but I do not control them · saw the content business as a losing proposition · content went digital(digitally ✕) · it seemed that · That's when my eyes opened up · could be delivered · the number of methods would expand(a number of ✕)

**어휘** outdated ↔ up-to-date · distribute ↔ collect · expand ↔ shrink · proposition ≠ preposition · content ≠ consent · promising = hopeful

**빈칸** 06 all distribution could be controlled by just a few companies

**삽입** 05 That's when my eyes opened up to the ownership of content → 04 뒤

## 모의 21 유연한 시간 문화의 회의 진행 함축 의미

**요지** 남미·유럽 일부·아프리카·중동 같은 유연한 시간 문화의 회의는 상록수와 같다: 의제는 줄기일 뿐, 선행 진행을 기대하지 않는다. 지난주의 우선순위가 지금은 아닐 수 있어 토론이 가지를 치고, 소그룹이 생긴다. 유능한 관리자는 변하는 필요를 활용하며, 중단·의제 변경은 자연스럽고 필요한 것.

**요약** In flexible-time cultures a meeting grows like an evergreen tree: the agenda is only a trunk, discussion branches off as priorities shift, and effective managers adapt as needs arise.

### 모의 32 사회적 불확실성과 공유된 의미 빈칸(원문항 02)

**요지** 가장 근본적인 인지 동기는 불확실성에 대비해 환경을 이해·예측하려는 것이며, 사람들은 타인과 공유된 의미를 선호한다. 입학 정원 초과로 라운지나 캠퍼스 호텔에 사는 학생들: 라운지는 사실 부족이 문제지만, 호텔은 시설이 좋아도 1년간 이웃이 될 안정된 집단에 속하지 못해 불확실성 속에서 기다려야 한다. 불확실성 자체가 문제 = 안정된 집단에서 생기는 공유된 사회적 이해의 결핍.

**요약** People most fundamentally want to predict their environment and share meanings with a stable group; students housed in campus hotels suffer not from poor facilities but from the uncertainty of lacking such a group.

### 모의 33 애도 작업 빈칸(원문항 08)

**요지** 심리학 이론들은 개인적 상실부터 집단적 상실까지 애도의 중요성에 동의한다. 애도는 의식에 필수적인 역동적 정서 과정: 자신과 타인의 취약성·덧없음·죽음을 직면하고 큰 상실 뒤 생명 에너지를 회복하게 한다. 애도 작업은 상실·슬픔·결핍을 존중하면서 자기 변화와 삶의 지속을 위한 토대를 마련한다(Weller: 사랑과 연민에 뿌리 둔 헌신). 잃은 것을 애도하면 남은 것에 대한 사랑과 헌신이 강해지고 피해를 복구·보상하려는 욕구로 이어진다 → 애도는 우리를 매우 슬프게도, 행동하도록 매우 동기화하기도 한다.

**요약** Grief is a dynamic process that lets us face loss and mortality, honors what was lost, and strengthens our commitment to what remains — leaving us both very sad and very motivated to act.

**어법** 01 theories ~ **agree** on · 02 a process **essential** to(essentially ×) · 03 supports us **to both face** ~ and **to repair** · 04 while also **setting up** · 05 **rooted** in · 06 grieve for **what** is lost(that ×) · a **strengthening** of · what **remains**(is remained ×) · 07 by **repairing** ~ and/or **compensating** for · 08 make us both very **sad** and very **motivated to act**(sadly ×; motivating ×; acting ×)

#### 모의 34 새로운 기술의 의도치 않은 영향 빈칸(원문항 01)

**요지** 미디어의 분명한 측면에 집중하면 날마다는 안 보이지만 시간이 지나며 쌓이는 변화를 놓친다. 전자레인지(1980년대 초): 오후 대부분을 들여 저녁을 준비하던 한 사람(대개 여성)을 해방시켰지만, 단기적·분명한 편리함이 '한 사람이 가족 저녁을 차리지 않게 된' 장기적 영향을 가렸다. 함께 저녁 먹는 가족이 줄었고, 오래 걸리는 식사는 과거의 사치가 됐다. 예견하기 어려웠을 영향.

**요약** We notice a technology's obvious short-term benefits but miss its subtle long-term effects, just as the microwave quietly ended the shared family dinner.

**어법** 01 the changes **that accumulate** over time but **are** not apparent(what ✕) · 02 while **missing** · 04 **was introduced** ~ and **revolutionized**(수동+능동) · 05 spent the better part of an afternoon **fixing** · 06 **it** was possible **to prepare** · **liberating**(liberated ✕) · most of **whom** tended to be women(which ✕; them ✕) · 07 made **it easy to overlook**(easily ✕) · no longer **having** one person **fix** food(to fix ✕) · for the family **to eat** · 08 **fewer and fewer** families · 09 Meals **that took** ~ **became** · 10 **were not anticipated** and **would have been** difficult **to foresee**

#### 모의 35 실시간 데이터와 디지털 트윈 무관한 문장

**요지** 디지털 트윈 = 모델링과 센서로 만든 자산·활동의 디지털 복제본. 새롭게 없지만(CAD 3D 렌더링 등), 더 빠른 무선망과 실시간 데이터가 훨씬 상세하고 역동적인 표현을 가능케 함. 센서 데이터로 지속 업데이트 → 물리적 대상의 실시간 정확한 사본. 터빈·제트엔진·기차엔진처럼 고가이고 가동 중단 비용이 큰 자산에서 보편화.

**요약** Digital twins are not new, but faster wireless networks and real-time sensor data now let them become continuously updated, accurate copies of valuable physical assets.

**어법** 01 replicas ~ **using** modeling and sensors(used ✕) · 02 teams ~ **have used**(has ✕) · 03 networks and the resulting availability ~ **enable**(복수) · **much** more detailed(very ✕) · 04 can **be used to** continuously **update**(updating ✕) · 06 digital twins ~ **are** becoming common · when downtime **would be** very costly

#### 모의 36 서식지 선택과 미래 필요 예측 순서

**요지** 먹이·은신·짝이 있는 환경을 고르는 능력은 생물학적 성공(번식 연령까지 생존 + 자손 생산)의 핵심 결정 요인. 동물은 현재 최적지를 찾을 뿐 아니라 미래 필요까지 예측한다. 검은가슴푸른솔새는 초여름에 먹이가 더 적은 붉은가문비 숲에 영역을 잡는데, 나중에 새끼가 먹이를 필요로 할 때는 그 숲이 먹이 구하기 쉽기 때문. 현재보다 미래의 양육 필요에 맞는 곳으로 이끌린다.

**요약** Animals not only find the best present resources but also anticipate future needs, as the black-throated green warbler settles among red spruce that will feed its chicks later.

#### 모의 37 문화의 발현으로서의 언어 순서

**요지** 언어는 문화의 발현. 아이들은 언어 자체가 아니라 상황에 맞게 유능한 소통자가 되게 하는 상호작용 패턴을 배운다. 개인주의 문화는 직접적·명시적(absolutely, certainly, positively), 집단주의 문화는 간접적·암시적(maybe, perhaps, probably). 영어만 I를 대문자로 쓰는 것은 개인주의의 뿌리가 잉글랜드임을 반영; 일본어엔 I에 해당하는 말이 없고 상황·성별·나이·관계에 따라 다른 말을 쓴다.

**요약** Language expresses culture: individualistic cultures speak directly and explicitly while collectivistic ones speak indirectly and ambiguously, as the capital "I" and its absence in Japanese show.

**어법** 02 patterns and styles ~ **that enable** them to **function**(enables ✕; functioning ✕) · 04 Examples ~ **are** · 05 **require that** collectivists **limit themselves**(should 생략; them ✕) ·, **using** terms(used ✕) · 06 the only language ~ **that spells** · 07 the fact **that**(which ✕) · 09 Different words **are used to refer to** the self(be used to-v) · depending on A, B, C, and D

모의 38 혼잡성이 감정에 미치는 영향 삽입

**요지** 환경심리학은 밀도(물리적 수치)와 혼잡성(공간 부족의 심리적 느낌)을 구별. 보통 고밀도 → 혼잡 → 감각 과부하·통제 결여·스트레스. 그러나 일부 심리학자는 혼잡성을 중립적 증폭기로 본다: 밀도가 높아지면 기분·행동이 강해진다 — 콘서트를 기대하면 즐거움 ↑, 두려운 행사면 더 나쁨. 공동체에서는 공격적 집단이 폭력화할 수도, 공원·보행 공간은 기분을 높이고 긴장을 완화.

**요약** Crowding — the feeling of too little space — is not simply negative; it amplifies whatever mood people already have, for better or for worse.

**어법** 02 high density **is needed** · crowding, **which makes** people **experience**(that ×; to experience ×) · 03 see crowding **as** neutral ~, and **believe that** · 05 make the person's experience of it even **worse** · 06 **Put** into a community setting(Putting ×) · turn **violent** · as density **rises**(raises ×) · 07 **creating** positive social spaces ~ may help (to) lift ~ and defuse

모의 39 조직 내 배제의 위험 삽입

**요지** 배제는 조직심리학자들이 무시해 온 상태라 예방 조치가 안 취해질 수 있다. 배제당한 개인은 위협받는 기분 욕구를 강화하려 긍정적 사회 행동(소속감·자존감)에 적응하면 배제 가능성이 줄지만, 적응 못 하면 더 배제되고 소통·활동에서 멀어져 조직 기여가 줄며 성과에 강한 부정적 영향. 예방 조치가 사업에 매우 중요.

**요약** Because organizational psychologists have overlooked exclusion, precautions often go untaken; excluded employees who cannot adapt withdraw, contribute less, and perform worse, so prevention is vital.

모의 40 과거 선행 회상과 미래의 관대함 요약문

**요지** 성인의 뇌는 선하고 공정한 행동을 이어가려는 선호를 지닌다. 스스로를 선행하는 사람으로 여기고 그에 맞게 행동하면 더 큰 선행의 동기가 된다. 대학생 100명 유급 연구: 과거 선행 목록을 쓴 뒤 기부 요청을 받은 참가자는 보수의 절반 이상을 기부 — 악행을 회상한 집단의 거의 2배.

그러나 타인의 반응까지 애써 묘사한 참가자는 행동 자체에 집중한 사람보다 훨씬 적게 기부 → 체면을 의식하면 덜 관대.

**요약** Seeing ourselves as doers of good motivates more good: students who recalled past good deeds gave nearly twice as much as those who recalled bad ones, and those focused on the deed itself gave more than those concerned with appearances.

모의 41~42 알고리즘 세계에서 인간 주체성 지키기 장문

**요지** 행동경제학의 '선택 설계': 선택 환경의 설계가 결정에 큰 영향. 알고리즘은 디지털 환경의 정교한 설계자로, 우리가 보고 추천받는 것을 골라 특정 경로로 낫지한다. 유익할 수도 있지만 설계자의 목적이 개인의 복지·자율과 어긋나면 조작 가능성. 인간 주체성을 지키려면 의식적 노력: 다양한 관점 찾기, 추천에 도전, 예측된 흐름을 거스르는 의도적 선택, 건전한 회의, 데이터는 과거의 반영이지 미래의 처방이 아님을 기억.

**요약** Algorithms act as "choice architects" that nudge our decisions, so protecting human agency requires critical engagement — seeking diverse views, questioning recommendations, and remembering that data reflects the past, not a prescription for the future.
